

Managed mobile

Are your employee's mobile devices an open door to the company's secure network and critical data?

Make activity visible and reduce security risks across the business' mobile estate. Achieve greater productivity and give end users a better quality experience.

Managed mobile provides enterprise-class, consolidated, mobile device management. Integrate disparate mobile devices with your corporate network. Provide secure access to corporate systems and data. Have effective controls for when devices are lost or stolen.

Talk to our infrastructure consultants to establish the cost benefits of integrating, monitoring and managing your mobile estate.

Benefits of managed mobile

- Improve operational efficiency with a flexible and productive workforce on the move
- Enable staff to provide your customers with a seamless experience
- Lower the unspecified variable costs of a disparate mobile estate to a fixed annual fee

Threats

- Lost data
- Breached security
- Lost devices
- Disrupted productivity

Key features

Mobile	Support remote personnel in their day-to-day activities and customer communications
Performance	Utilise business-critical information and applications on the move to boost productivity
Secure	Built-in encryption safeguards content when sent over public networks
Access	Provide a personalised experience based upon individual roles and responsibilities

Overview

Device management
Policy configuration
Managed device warranty
Remotely wipe lost devices
Enforce security protocols
Frequent reporting
Mobile Support
Mobile Reporting

Description

Monitor and manage company and end-user mobile devices throughout the device lifecycle
Simplify policy management, to target individual mobile devices, a specific group, or an entire network
Ensure all asset warranties are up to date
When a mobile device is lost or stolen all data on the device and SD Card can be erased
Complex security protocols can be applied and amended across the mobile estate
Frequent reporting can be instigated, to ensure end-to-end security and compliance across mobile device platforms. This reporting can initiate and automate compliance actions, such as full or selective wipe of devices when they deviate from policy
For approved mobile devices
Create reports, at an agreed frequency across your mobile estate

Optional extra

GPS device tracking	A reliable and highly accurate service to account for mobile devices across the estate
----------------------------	--

“40% of IT decision makers let workers access corporate information from employee-owned devices, but 70% of employees indicate that they access corporate networks this way”

International Data Corporation

Be a step ahead, secure your mobile estate.
