

Cloud solutions

Improve collaboration and the availability, control and security of your data, while freeing up capital.

People now work in a more mobile and dynamic way than ever before. Well-planned and managed cloud solutions support this new reality and empower your staff to deliver more value for your organisation.

Getting the most from the cloud starts with being clear about how it can best support your long-term business objectives. At Network Interlinks we help you understand the possibilities, then we deploy and manage cloud solutions to deliver tangible and measurable benefits.

Talk to our consultants about how you can put the cloud to work for you and your organisation.

Benefits of cloud solutions

- Improve collaboration and responsiveness across your organisation
- Minimise capital expenditure while ensuring systems remain up-to-date
- Gain oversight and control of data access and security

Our approach

- Run discovery workshop(s) to define your business objectives
- Agree criteria for success
- Review whether cloud solutions meet your business needs
- Plan requirements, solutions and deployment
- Plan integration with existing systems
- Review cost-of-ownership and return-on-investment analyses
- Run proof of concept/pilot
- Full roll out

Key technologies

Below are some of the technologies we frequently use in our cloud solutions, along with an overview of the benefits they can deliver.

Azure	Azure is a growing collection of integrated cloud services – analytics, computing, database, mobile, networking, storage and web – for moving faster, achieving more and saving money.
Cloud	Microsoft Cloud is the platform that brings together a series of cloud services and enables them to be configured and deployed reliably and securely.
SharePoint Online	Sharepoint Online is a cloud-based service that helps organizations share and collaborate with colleagues, partners, and customers.
Exchange Online	Exchange Online integrates with Microsoft Outlook, enabling you to make use of hosted email, calendars and contacts.
AWS	Amazon Web Services (AWS) is a secure cloud services platform, offering compute power, database storage, content delivery and other functionality to help businesses scale and grow.

“Businesses taking advantage of productivity-enhancing cloud services grow 19.6% faster than their counterparts that don’t”

Skyhigh Networks

Make the most of what the cloud can bring to your business.
