

Microsoft Office 365

Is it right for your organisation? And which components do you actually need to gain tangible business value?

With its integrated cloud platform, advanced user features and subscription-based pricing, Microsoft's Office 365 is an attraction option for many organisations. However, it is not always necessary to invest in the full suite of Office 365 solutions to achieve your business goals.

To help you make the right decision for your organisation, Network Interlinks will conduct a thorough assessment of your IT environment, business objectives and user needs. Then we will help you implement the components of Office 365 that are right for you, enabling you to derive the greatest value for the lowest spend.

Benefits of Office 365

Lower CAPEX	License all your Microsoft applications and services for a monthly or annual subscription - scaled as your business requests to, and get software upgrades delivered automatically for no extra cost
Easier collaboration	Work more productively with colleagues and partners from any location with shared files, aligned calendars and improved communications
Any device	Allow users to work more flexibly using their choice of device, including tablets and smart phones with any operating system
Flexible management	Add and remove users flexibly and manage your environment with a straight-forward web-based administration console

Key features

Value assessments	Trust Network Interlinks to assess your business requirements and only recommend components of Office 365 if they will deliver tangible business value
Risk assessments	Expect honest advice; if your enterprise resource planning (ERP) package is heavily integrated with email, let us establish whether Exchange Online is the right solution for your business
Disaster recovery assessments	Be aware that Office 365 alone is not a complete disaster recovery solution and get advice from our business continuity experts
Tailored implementations	Migrate quickly and smoothly to Office 365, with the reassuring support and guidance of our Microsoft-certified professionals

Key features of Office 365

SharePoint Online	Make policies, project documents, marketing libraries, report templates and other materials more accessible to employees and partners
Exchange Online	Allow your employees to access email more easily using the Outlook Web App and get a 50GB mailbox for every user
Familiar Office Apps	Keep users happy and productive by giving them the office suite they already know
Lync, Skype, Yammer	Communicate the way you want to with integrated instant messaging, voice and video calls and social media
OneNote	Brainstorm ideas, take notes on any device, store them logically alongside other files and share them with colleagues
Flexible packages to meet your needs	Choose solutions from Office 365 for small businesses, Office 365 for enterprises or Office 365 for education

“With Office 365, there are so many different plans and options that it’s important to know what you gain (or lose) before you choose one.”
